## What are the Medieval Times?

Also known as the Middle Ages, the Medieval period in history spanned roughly 1,000 years, ending between 1400 and 1450. In Spain, however, 1492 is considered the end of their medieval period and the beginning of the modern era.

The period was one of human expansion, centralization and great political upheaval and violence, resulting in the foundation of many modern European countries.

It was also dominated by a surge in Christianity leading to the building of great cathedrals, clearing of large tracts of land by peasants, settling of new towns and villages, and building of great castles by local nobility.
